Management Policy for plant and tree maintenance

Plants and trees are natural resources and these should be properly nurtured.

1. Plants and trees in the campus should be properly cared and watered especially in summer season.
2. Organic manures should be equally used as and when necessary.
3. Recycled water available in the campus can be used for watering.
4. Plants and trees should not be cut-off or damaged without the permission of project management.
5. The Project Manager should visit the site before giving permission to cut trees and plants.
6. Cutting can be allowed only when there is public nuisance or threat to life.
7. When one tree or plant is demolished another one should be planted.
8. The Gardener should check plants and trees in the campus regularly and he should be supervised by project staff.
