

## WATER CONSERVATION & MANAGEMENT POLICY

### Introduction

Saintgits College of Applied Sciences derives policies to ensure water availability and its conservation in the campus. College has taken measures to ensure availability of water throughout and effective consumption. Meticulous efforts are taken to ensure safe and clean water supply and following measures are adopted for the same.

- College encourages water conservation through rainwater harvesting structures, open well, tank and waste water recycling.
- Water stored through Rainwater harvesting system helps in meeting the needs during summer season and as and when demand arises.
- Students are sensitised not to waste water unnecessarily
- College has maintained open well and tanks for uniform distribution of water in the campus.
- The institution takes measures to reuse the waste water in an efficient manner through STP
- The recycled water thus obtained is used for gardening purposes.
- To ensure safe drinking water facility, water purifiers are established inside the campus.

Water conservation measures imparted helps the stakeholders to overlook not only on preserving water for future use but also to keep environment healthy and balanced.
