Library Per Day Usage Calculation

Step 1- Total number of users of the Library (1 Year)

April 2023 to March 2024

Step 2- Total number of working days (1 Year)

April 2023 to March 2024

Step 3- Divided the calculated total number of users of the Library obtained in Step 1 by the Total number of days obtained in Step 2.

Results Obtained

Step 1- 17632

Step 2- 249

Step 3- 70.82

Results

Average per-day usage of library = 70.82

Total number of students = 946

Total number of teachers = 68

Percentage per day usage = $\frac{\text{Number of teachers and students using the library per day}}{\text{Total number of teachers and students used the library}}$

$$= \frac{70.82}{946+68} * 100 = 6.98 \%$$

$$946+68$$
